[Best Free Movie Thing For Mac Computers](#)

[Best Free Movie Thing For Mac Computers](#)

The software also comes with a feature called 'Auto Ducking' which uses Adobe's proprietary AI based 'Adobe Sensei' technology to figure out places where you may want to lower the volume of a background track in order to make the vocals, speech, etc sound clearer, making your job much easier to do.

Audition comes with features like multi-track editing and mixing which will definitely make your audio editing experience much easier and efficient.. The app comes with some incredible features that have been honed with the many years of experience Adobe's team has in creating powerful applications for professional users.
